Reconocimiento por haber impartido el taller de "Programación orientada a objetos en C# .NET"

Reconocimiento por haber impartido el taller de "Desarrollo de aplicaciones con XAML"

Reconocimiento por haber impartido el taller de "Android con Xamarin Studio y C# 6"

Israel Calderón de la Cruz

.NET Mobile Developer

Montemorelos, Nuevo León, Mexico

Summary

I am a .NET Mobile Developer focused on building and maintaining reliable mobile applications within the Microsoft ecosystem. My work emphasizes clean architecture, maintainable code, and efficient collaboration with cross-functional teams to deliver high-quality software.

I actively integrate AI-assisted development using Windsurf, leveraging structured prompts to support implementation tasks, improve productivity, and review Pull Requests with a strong focus on code quality and maintainability.

My workflow includes working with multiple development and product collaboration platforms, including Azure DevOps, Figma, and Confluence, which I use as MCP tools to support the development lifecycle. Through these platforms, I review design specifications, create and refine Product Backlog Items (PBIs), document technical solutions, and align implementation details with product and design requirements.

I am comfortable translating product ideas into technical solutions by analyzing requirements, reviewing design files, documenting architecture decisions, and collaborating across engineering and product teams to deliver mobile features efficiently.

My goal is to continuously improve development workflows by combining modern engineering practices with AI-assisted tooling while building scalable mobile solutions in the .NET ecosystem.

Experience

Atos

Xamarin Mobile Developer

November 2021 - Present (4 years 8 months)

Monterrey, Nuevo León, México

- Designed and implemented reusable, high-performance custom controls to enhance UI consistency and maintainability across the main application.
 - Developed and integrated complete application workflows, ensuring smooth navigation, data handling, and seamless interaction within the core platform.
 - Collaborated with cross-functional teams to align technical solutions with business requirements, leveraging .NET MAUI capabilities for cross-platform development.
 - Applied best practices in code structure, performance optimization, and maintainability to ensure scalable and future-proof application features.
-
- Experience using Windsurf and GitHub Copilot to accelerate development in JetBrains Rider with .NET MAUI projects. Implementation of MCPs connected to Atlassian, Azure DevOps, and Figma, optimizing workflows and cross-disciplinary collaboration.
 - Familiar with creating and refining prompts for repetitive tasks through Generative AI in Windsurf, leveraging models such as GPT-4.1 and Gemini to improve productivity, enhance code quality, and reduce delivery times.

Enroute

Xamarin Developer

July 2021 - October 2021 (4 months)

Monterrey, Nuevo León, México

- I collaborate adding new modules for UWP application
- Implementation of Syncfusion library to improve screens

Soft/M

1 year 2 months

Senior Xamarin Developer

November 2020 - September 2021 (11 months)

Monterrey, Nuevo León, México

Senior Xamarin Developer

August 2020 - November 2020 (4 months)

Monterrey, Nuevo León, México

Building Xamarin Forms application from scratch for Healthy Area

Implementation completely UI from Invision project

Implementation of Google services, Analytics, Push Notification and Authentication

Get information from API to show medical lab results

Creation of custom control to show medical lab results

Quarksoft

Xamarin Mobile Developer

June 2019 - June 2020 (1 year 1 month)

Ciudad de México y alrededores, México

I build modules for a mobile application that it allow register fails of gas station and it allow register some pieces of gas station installed or uninstalled.

Documentation analysis for apply functionalities to mobile applications.

Creation of DLD (Detail-Level Design) for document an interpretation of technical requirements for components.

Style's design for adapt modules to enterprise identity

I used and modified Rest API for get data from .NET server.

I customized controls.

I applied custom maps for show route to attend gas stations.

Skills used

Git, TFS, .NET, Xamarin Forms, API Rest, Maps, Push Notifications, SQLite

Herbalife Nutrition- Distributore Indipendente

Xamarin Mobile Developer

July 2018 - June 2019 (1 year)

Ciudad de Guadalajara, Jalisco, Mexico

Collaborated in the development of backend modules for different apps. I build an application iOS and Android using Xamarin Forms and integrating layers of project like web api, models and another.

Ericher Agencia Aduanal

4 years 2 months

Software Developer and Computer Support

November 2014 - July 2018 (3 years 9 months)

Nuevo Laredo Area, Mexico

Software development with C#, VB .NET, Web Development with ASP .NET with MVC 4

Junior Software Developer - Intenrship

June 2014 - October 2014 (5 months)

Lear about of forwarding process, know the database structure and code of applications

Ermilo E. Richer Forwarding Agency

Mobile Application Developer

June 2014 - July 2018 (4 years 2 months)

Nuevo Laredo, Tamaulipas, México

Design, Building and Support of Internal Applications like Mobile, Desktop and Web Application. Users Support

Education

Instituto Tecnológico de Nuevo Laredo

Computer Systems Engineer specializing in developing mobile applications, Information Technology Project Management · (2010 - 2014)

Instituto Tecnológico de Nuevo Laredo

Ingeniería en Sistemas Computacionales, Especialidad en Dispositivos móviles · (2010 - 2014)
